

Naim has always been synonymous with ground-breaking products and the tradition continues with the DVD5 - our first DVD player. Like numerous Naim source components before, the DVD5 raises the bar - performing with DVD, DVD-Audio and CD media to a level well beyond its competition. The DVD5 establishes a new reference level for DVD video quality combined with truly versatile, upgradeable and standard-setting musical performance.

VIDEO EXCELLENCE

The DVD5 incorporates multiple hi-performance technologies - Faroudja DCDi® de-interlacing for example - and supports DVI for outstanding digital video performance. Multiple analogue video formats are also supported including composite, s-video, YPbPr interlaced, RGB interlaced and YPbPr progressive. For non-macrovision encoded discs RGB progressive and RGBHV are also available to provide the ultimate analogue video performance.

For enhanced large display performance a scaler upgrade is available offering custom resolutions up to an incredible 1080p. The scaler also boasts an external input for external video sources such as digital set-top boxes.

AUDIO EXCELLENCE

Unlike most DVD players the DVD5's audio CD performance is not simply an afterthought - it out performs many CD players. To achieve this, the player's audio decoding board is physically separated from the DVD boards and its video processors and outputs can be put to sleep during CD playback. The CD audio data stream is also re-clocked before entering state-of-the-art 24bit 192kHz digital to analogue converters - a technique borrowed from the CDS3 CD player. The DVD5 can also replay stereo DVD Audio at maximum sample rate and, with the optional multi-channel upgrade, can replay DVD Audio in 7.1 surround.

SPECIFICATION

- Media Supported:** DVD-Video, DVD-Audio, DVD+/-R, DVD+/-RW, CD Audio, CD-RW and CD-R
- Video Outputs:** Digital Visual Interface (DVI) with HDCP copy protection
RGB/RGBHV (for non-macrovision encoded discs) via BNC, 75Ω
YPbPr via BNC, 75Ω
RGB interlaced (for non-macrovision encoded discs) via SCART, 75Ω
YPbPr interlaced via SCART, 75Ω
S-video via 4 pin DIN, 75Ω
Composite via SCART, 75Ω
- Video Features:** Faroudja DCDi® de-interlacing technology
Automatic PAL or NTSC playback and conversion
Black-level setup for NTSC (OIRE or 7.5IRE)
Up to five different format simultaneous video outputs
16:9 and 4:3 aspect ratio support
Video zoom support
Picture adjustment including saturation, contrast and position
-60x -30x, -16x, -8x, -4x, -2x, 2x, 4x, 8x, 16x, 30x, 60x speeds
Full easy to navigate OSD with built in test screens for display calibration
Scaler upgrade card with custom resolutions including 720p and 1080p
Full +/- time delay lip sync
- Audio Output:** Two digital coax and two digital optical.
2 Volt RMS analogue stereo from 24bit, 192kHz re-clocked DACs via 5 Pin DIN and stereo phono sockets
Up to 7.1 channel with multi-channel audio upgrade fitted, 24bit 96kHz: via DIN sockets
- Communications:** Full integration with naim AV2 processor including AV2 OSD
RS232 control for custom install and home automation.
- Dimensions:** 70mm x 432mm x 301mm
- Power Supplies:** Fully Linear, 20 independently regulated supplies with advanced ground system.
- Mains Power:** 100 - 120VAC or 220 - 240VAC 50/60Hz, 50W
